RECAP

- General 받침 Rule - 받침 + ㅇ = 받침 moves over

- **Consonant assimilation**

1. Amplifier consonants

- ㄱ ㄷ ㅂ + ㄱ ㄷ ㅂ ㅅ ㅈ = ㄲ ㄸ ㅃ ㅆ ㅉ

2. Nasal consonants makes Natural pronunciation

- ㄴ ㄹ ㅁ ㅇ

3. ㅎ 받침 - Silent / Aspirator / ㄷ 받침

4. Palatalization

The diagram illustrates a phonetic rule in Korean. On the left, the syllable '안아' (an-a) is shown. A yellow circle highlights the first '아' (a), and a yellow arrow points from it to the second '아' (a). On the right, the syllable '안자' (an-ja) is shown, where the '자' (ja) is highlighted with a yellow circle. A black arrow points from '안아' to '안자', indicating the transformation.

How to learn Korean

- **Roadmap to Build the Language Core**
- **First step is to understand how Korean works as a language**

WRONG APPROACH

INPUT

- English

PROCESS

- Translating
 - Either mentally or with a translator

OUTPUT

- Can't speak naturally
- Awkward Korean

Why wrong?

- Korean is a totally different language
 - The word order is different
 - The way the language functions as a whole is completely different**
- So many Korean words don't exist in English and vice versa
 - **Word for word translations often make no sense**
- **Korean is highly contextual** that even Koreans get it wrong sometimes

Just how contextual is Korean?

I love you
(나는) (너를) 사랑해
I YOU LOVE

- The subject (나는: I) and the object (너를 : You) **are completely dropped**
- **Does NOT specify who loves whom**

BUILD YOUR LANGUAGE CORE THIS WAY

INPUT

- Korean (Full Sentence)

PROCESS

- Deciphering
- Understanding how words come together to form the whole

OUTPUT

- Form your own sentences using the same structure
- Read out loud

How Korean works

- Sub Time Location Obj How Verb Framework
- Introduction to Particles
- Word order
- Verbs – Why Korean is one of the most difficult languages

(With Effort)

- Grammar happens at the **END** of each section separated by spaces
- Get used to the acronym

PARTICLES

Sub	Time	Location	Obj	How	Verb
나는	아침에	집에서	한국어를	열심히	공부해요
I	Morning	Home House	Korean	Hard (With Effort)	Study

- **Particles link words** together to form sentences and indicate the roles (STLOHV) of words
- Their roles are not limited to but include what prepositions do in English (in, at, on...etc.)
- Many particles are non-existent in English
 - Just like [a/an & the] don't exist in Korean

How to study sentences

Input Stage

나는 | 아침에 | 집에서 | 한국어를 | 열심히 | 공부해요

I	Morning	Home	Korean	Hard	Study
		House		(With Effort)	

1. Separate the sentence by spaces
2. Look up each word

- Do not translate the whole sentence

- 한국어 – Object
- 한국어**를** 공부해요 – I study Korean
- 한국어**도** 공부해요 – I study Korean, too
- 한국어**만** 공부해요 – I study Korean only

How to study sentences

Process Stage

Sub	Time	Location	Obj	How	Verb
나는	아침에	집에서	한국어를	열심히	공부해요
I	Morning	Home House	Korean	Hard (With Effort)	Study

I study Korean hard at home in the morning

3. Identify **STLOHV**
4. Connect the dots
5. Understand the logic behind the sentence formation.

How to study sentences

Output stage

S	T	L	O	H	V
나는	저녁에	도서관에서	책을	조용히	읽어요
I	Evening	Library	Book	Quietly	Read

I read books quietly in the library in the evening

6. Write your sentence using the same structure
7. Read it out loud until it feels natural.
8. Repeat

Word Order

I study Korean hard at home in the morning

나는 아침에 집에서 한국어를 열심히
아침에 나는 집에서 열심히 한국어를
집에서 나는 아침에 한국어를 열심히
나는 아침에 열심히 한국어를 집에서

More variations

They're ALL correct

Why do they change?

Comparison with English

I did it already vs I already did it

slight difference in the tone

Korean expresses nuance with diff word order + intonation

Why do they change?

Comparison with English

- I'm **NOT** in love with him – Absolutely not
- I'm not in **LOVE** with him – I like him but not in love
- I'm not in love with **HIM** – I'm in love with someone else

Korean expresses nuance with diff word order + intonation

How to distinguish?

집 : Home / House

- 집은 / 집이 : Subject
- 집을 : Object
- 집에서 : Location

The particle indicates the role of the word

There's no "right" order

- **V**erbs typically come at the very end of the sentence
- **What comes right before the verb is typically the most important information**
- Need a lot of listening and immersion to **"feel the vibe"**
- Don't stress too much about the order

Verbs

- **Adjectives are verbs in Korean?**
- **Verb Stem**
- **Verb ending**
 - **Tense**
 - **Context Marker (Sentence endings)**
 - **Sentence Types**
 - **Speech Type (Respect level)**
 - **Honorifics**

Adjectives are Verbs

공부하다 : To study (V.)

조용하다 : Quiet (Adj)

The room **is quiet** vs A quiet room

- Adjective at the end of a sentence is called **a descriptive verb**
- Descriptive verbs follow the same conjugation rule as verbs (ex: 하다)

Verb Stem

먹다

To eat

- All Korean verbs have ~**ㄷ** form.
- These forms are called Dictionary form or Base form
- Once you remove **ㄷ**, you have your verb stem

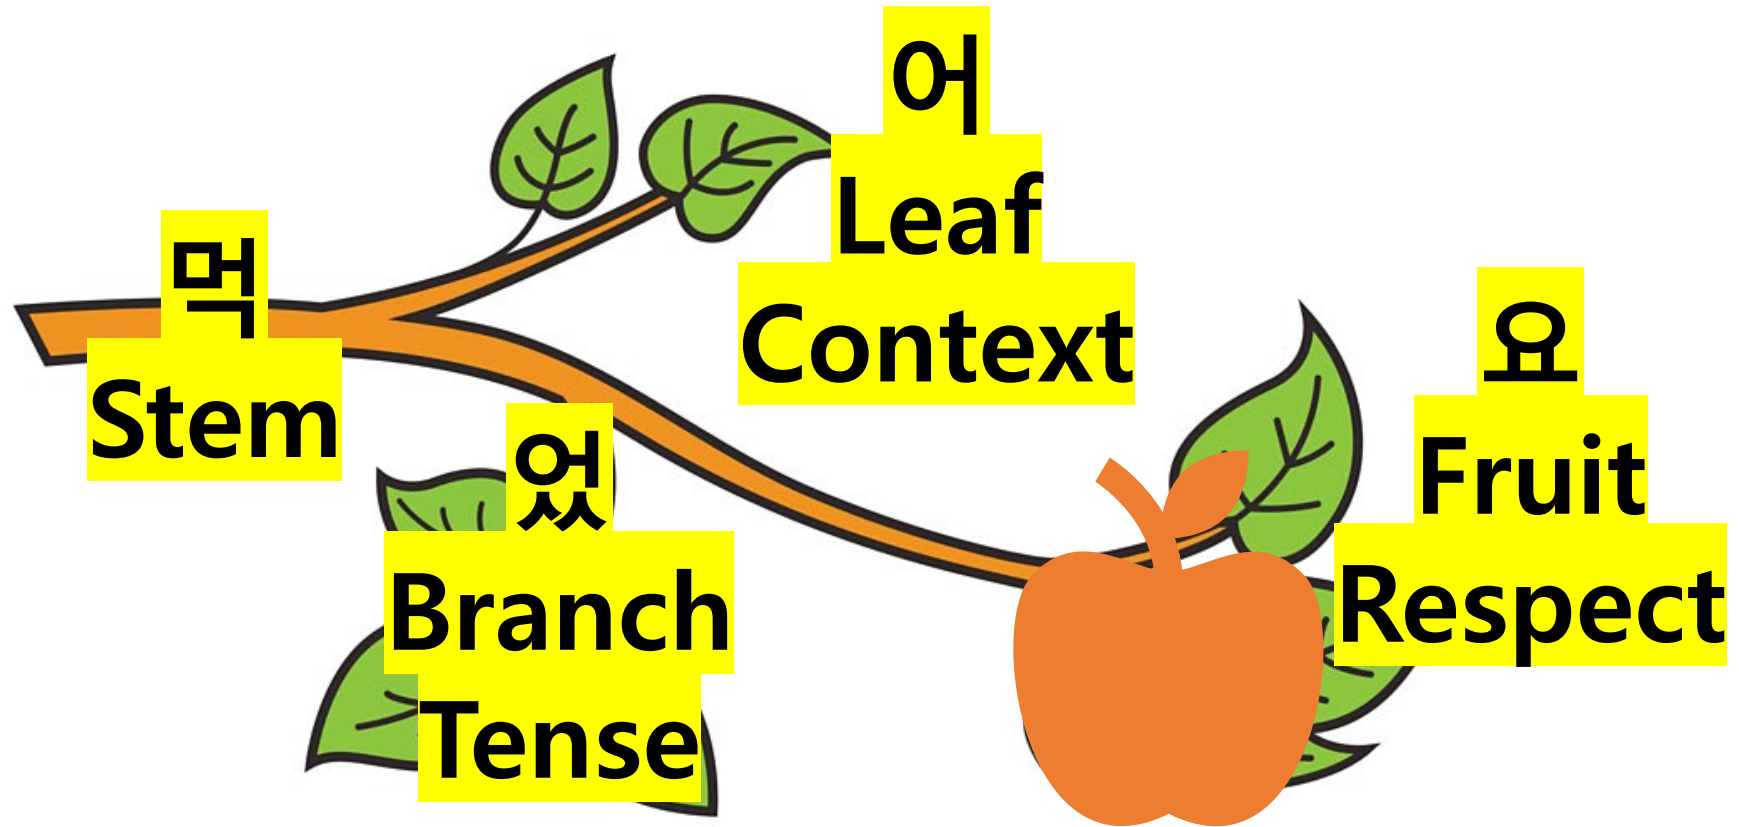

Verb Ending

Stem	Ending
먹	었어 요

Ate (Past tense)

- Conjugations happen at the ending
