More emphatic than ~요 – Verbal emoji

◆ 거 (것): Thing + 이다: To be

• Literally, “It is the thing that ____.”

• Adds nuance, emotion, or emphasis

▶ Feels like: “So!” “The thing is...” “You see...” “What I’m saying is...”

◆ You can use ~는 거다 when

- 내가 어제 개한테 전화를 했는데 안 받는 거야. 그래서 문자도 보냈어.

→ (You see,) I called him yesterday but he doesn't answer. So, I also sent him a text message.

Beginning of a story

◆ Why present tense?

Similar to how we tell stories in English
→ So, this guy walks into a bar.

2. To ask or clarify information

- 근데 우리 내일 집에 몇 시에 가는 거예요?

→ (But wait,) What time are we going home tomorrow?

◆ 근데 = 그런데: But

3. To add emotional emphasis

- 뭐 하시는 거예요? - More aggressive or curious than 뭐 하세요?

→ What is it that you are doing?

→ What the hell are you doing?

▶ Tone matters! Can feel different depending on delivery.

~는 거(것) 같다

Expressing opinion (softly)

◆ 같다: To be like

▶ Literally, "It is like the thing that ____."

▶ Often translated as: "I think ____" — but! There's **no 'thinking'** involved (no **생각하다**)

• "It seems like..." rather than "I think..."

→ Softening the tone of your personal opinion

◆ Language shows culture.

Group > Individual Opinion

• Korean often avoids strong "I" statements.

[제가 케이팝을 잘 모르는 이유]는 [티비를 보지 않기 때문]인 것 같아요 [이다]

• I think [the reason why I don't know much about K-pop] is because I don't watch TV

To modify a reason like "Reason why"
